Press release - 26 February 218

Dear Madam, dear Sir, dear customers and partners,

BIO-UV is doing great and going forward !

Some of you have indeed well noticed that since the beginning of this year, **BIO-UV** has become the **BIO-UV Group** as the company was wound up by means of the universal transfer of all its assets and liabilities to its holding company **BIO-UV Group**.

In spite of slanderous rumours, **BIO-UV** achieves **2% growth** and the **Gross Operating Income increases by 300% !**

The Group's turnover is above **10 M€ in 2017**.

The future is promising, on the recreative markets such as private pools and spas, aquaculture, as well as the ballast water treatment **BIO-SEA**, and among many others...

In order to bring a fair and reliable information, the **BIO-UV** company has been absorbed by its **BIO-UV Group** holding company, and this transfer has no impact.

On the contrary the Group's legal structure is therefore simplified.

We also would like to wish our customers and partners the best for this 2018 season.

See you soon,

Benoît GILLMANN and the BIO-UV Team

BIO UV

Group
