Oirschot, 01-03-2018: **ZebraPort** is proud to announce a new co-operation with the **Bio-UV Group**, the French UV water treatment specialist. Both companies agreed to start working together in the Netherlands with the **Bio-UV** industrial products.

In the Netherlands the French manufacturer is already known for its UV-C ultraviolet products for consumer fish ponds. As **Bio-UV** would like to expand its Ultraviolet Solutions in the industrial markets, they asked **ZebraPort** to assist them in the further expansion of the footprint, starting in the Netherlands.

With the co-operation in place, it is therefore possible for both current customers and new relations to benefit from the direct communication lines and knowledge of **ZebraPort**.

As René Staal, Business Development Director says: “I am very enthusiastic about this new co-operation with this experienced manufacturer of Ultraviolet Solutions. I am looking forward to working with the **Bio-UV Group** experts and the assistance we are going to give to current and new customers in the Netherlands for several industry areas. For example, for Legionella prevention, (waste) Water treatment, Pool & Spa’s dechloramination, Aquaculture, Aquariums and fountains. Potential clients are Intergrators, Module manufacturers, Engineering and Environmental companies.”

***ZebraPort** is developing the business for technical companies in various industries from several countries. They are bringing together supply and demand*

from their home base in the industrial Brabant area, The Netherlands. **ZebraPort** acts as an intermediary or agent for manufacturers and spare part suppliers.

BIO-UV Group, the leading French manufacturer of ultraviolet light water treatment equipment, designs, manufactures and markets systems and concepts of disinfection by ultraviolet light (UV-C) adapted to a large number of applications : automatic chlorine-free treatment for private and collective swimming pools and spas, treatment of waste water, production of drinking water, ballast water treatment...
